Senior Lead Product Designer · *enterprise platforms & AI*

15 years in design, 9 in product design, across enterprise platforms, banking and e-commerce. At Airtel I own design for the Cloud platform end to end, from its 0→1 launch to identity and access, and lead a team across CPaaS, IoT and Martech, including Airtel's first AI campaign features. I take on the most ambiguous, high-stakes problems and turn them into platforms customers and leadership can trust — using AI tools to move from idea to working prototype fast.

SELECTED ACHIEVEMENTS

- **Airtel Cloud** — led design through the August 2025 launch, bringing six tools built by four teams into one platform; 18 enterprise clients in year one, contract value growing from ~US\$2M toward ~US\$21M.
- **Campaign platform (IQ Reach → UCLM → AI)** — three years taking an ops-dependent tool to mostly self-serve, then unifying five campaign tools into one platform, sold to an internal client before build and rolling out in Africa.
- **AI Campaign Manager** — leading Airtel's first AI initiative in campaigns: send-time and content recommendations plus an agentic campaign builder, where a person approves before anything is sent.
- **IQ Conduit** — led vendor registration and campaign-traffic design for a business line with a ~US\$65M revenue target.
- **Business Name Display (IoT)** — designed end to end; ~US\$175K revenue within three months of launch.
- **AI adoption** — 86% of 96 tracked team workflows now use AI tools, saving an estimated 30–40% of working hours.

EXPERIENCE

Airtel Digital — Senior Lead Product Designer

2023 – present

Own design for Airtel Cloud and lead a team of two across CPaaS, IoT and Martech. Hands-on on the most ambiguous problems; set direction and align product, engineering and leadership.

Cloud platform

- Learned the cloud domain from scratch and mapped the full order-to-activation lifecycle before designing.
- Unified the console, Assurance, key management, security posture, Cost Analyser and migration into one design language; ran a pre-launch audit that identified 65 fixes.
- Designed key management from the vendor's spec; the build partner adopted the prototype as its reference.
- Leading identity & access management: a provider-agnostic model (Provision → Define → Assign → Assume), built in-house.

Campaigns: IQ Reach, UCLM and AI

- Led the most logic-heavy IQ Reach flows: campaign creation, reporting, media and template centres, DND and blacklist.
- Led design for UCLM through four alignment rounds across seven teams; Phase 1 shipped nine capabilities; made compliance and billing configurable per market for Africa.
- Set the principle for every AI module — the person defines the outcome, AI handles the complexity, the person approves — and split module ownership across two designers while owning the agentic layer.

IoT, DLT & team

- Owned consent, complaint, asset and spam flows across compliance-heavy platforms; designed Spam Shield hands-on.
- Built a stable, high-ownership team of two; introduced AI-first workflows, including dev-ready screens generated from the design system.

HDFC Bank — AVP, UX/UI Designer

2021 – 2023

- Designed the used-vehicle loan journey end to end, aligning business, marketing and sales.
- Led the KYC completion revamp for a partner integration, balancing UX with new compliance rules; redesigned account and settings, validated through user testing.

Tata CLiQ — Product Designer

2019 – 2021

- Owned the electronics product page and old-product exchange, grounded in buyer interviews; built order tracking and the warranty flow.

Earlier roles

2011 – 2019

ExBorders — Visual / UI Designer (2017–19), web and mobile end to end · Brandwidth & FH MKTG — Visual Designer (2013–17) · Arvind Mills — Visual & Retail Merchandiser (2011–13)

SKILLS

Platform strategy	Systems design	AI product design
Discovery, platform IA, roadmapping, prioritisation, business-process mapping	Complex workflows, enterprise UX, role-based experiences, design systems	Human-in-the-loop flows, explainability, agentic workflows, AI-assisted prototyping

TOOLS

Claude · Gemini Enterprise & Gemini CLI · ChatGPT · Figma Make · Lovable · Bolt · Figma · Illustrator · Photoshop · Jira · Confluence · Notion · Miro

EDUCATION & LEADERSHIP

NIFT Mumbai — B.Des, Communication Design (2011)	IDC School of Design, IIT Bombay — HCI Design (2018)
Interaction Design Foundation — UX: The Beginner's Guide (2017)	Toastmasters — active member; VP Education (2023–24)
